

# INDUMATHI RAMARAJ

Coimbatore  
+91 9952356475 induammu223@gmail.com

## PROFESSIONAL SUMMARY

Versatile Software Developer skilled in crafting intuitive UI, integrating complex APIs, and solving technical challenges with creative approaches. Experienced in leading teams, enhancing system efficiency, and driving product improvements across multiple projects. A dependable collaborator with a passion for innovation, performance optimization, and building user-centric digital experiences.

## TECHNICAL SKILLS

- **Frontend:** HTML5, CSS, Tailwind CSS, Bootstrap, Javascript, Typescript, React.js, Next.js, React Hooks, Web Performance, Redux (Saga/Thunk), Axios, Fetch, Responsive Web Design, Browser Developer Tools, React Table, JQGrid, TanStack Table
- **Backend:** FastAPI, RESTful APIs, Swagger Documentation, Postman, Express, JWT Auth.
- **Database:** MySQL, PostgreSQL
- **DevOps & Cloud:** Docker, AWS Deployments, Thoropass, Microsoft Azure
- **Tools & Platforms:** GitHub, GitLab, Postman, Swagger API, JIRA, Figma
- **Agile Methodologies:** Enterprise Design Thinking

## WORK EXPERIENCE

### HMG TECHNOLOGY - Software Developer

October 2022 - Current

- **School Safety Project:** Managed critical data for 300+ American school districts, ensuring compliance and client satisfaction.
  - Developed and integrated front-end UI components with back-end APIs.
  - **Administration Dashboard:** Optimised administrative workflows for better efficiency.
  - **Backend Operations:** Built and tested RESTful APIs (GET, PUT, DELETE) using SQLAlchemy in Python, deployed via Docker, and validated with FastAPI & Swagger.
  - **Mentorship & Training:** Conducted React.js training, provided UX guidance, and led API testing initiatives.
  - **Database Management:** Ensured data integrity through precise entry, updates, and verification.
  - **Code Review & Deployment:** Managed AWS deployments, facilitated peer reviews, and upheld software quality.
  - **Project URL:** <https://analytics.smartdatadashboard.com/login>
- 
- **834Labs** – New Client Project (under HMG Technology)
  - Took full ownership of the **Agility-CRM module**, driving improvements and stabilising core functionalities.
  - Leading the migration of tables from Azure Synapse to PostgreSQL, ensuring optimised structure, performance, and data consistency.
  - Working closely with backend engineering teams to align **API structures, data flows, and integrations**.
  - Working closely with the **AI team to integrate new APIs and UI components** for enhanced product capabilities.
  - Implementing **custom audio players** and interactive UI elements to support advanced automation and AI-driven features.
  - Leading the Front-End team for 834Labs, managing development workflows, UI architecture, and feature delivery.
  - **Project URL:** <https://myops360.834labs.com/login>

## BOOSTMYSHOP Private Ltd - Software Engineer

July 2021 - September 2022

- Developed seamless API integrations to facilitate real-time data synchronization.
- Developed a robust chat feature to enhance communication between customers and market personnel,
- improving user experience and support efficiency.
- Project URL: <https://pricing.boostmyshop.com/en/dashboard>

## NEWGEN Infotech - Intern

February 2021 - April 2021

- Optimized college server functionality by creating efficient e-campus technology frameworks utilizing Microboard Dashboard.

## Octavalley - Intern

December 2020 - January 2021

- Established responsive layouts through skilled use of HTML, CSS, and JavaScript.

## EDUCATION

---

### TamilNadu Open University Chennai

2023 - 2024

MBA Human Resource

### Hindustan College of Engineering and Technology Coimbatore

2018 - 2022

Bachelor of Engineering CSE

## PROJECTS

---

- **HelloFixy:** Created a web platform for household services that improved vendor-customer interactions and reduced booking time by 35%.
- **Kompres:** Spearheaded the modernization of a decade-old codebase, enhancing system performance by 45%, and successfully integrated THINGS BOARD for real-time data management.
- **Interactive Web Applications:** Developed dynamic React applications, including Tic-Tac-Toe, Digital Clock, and Stopwatch, which enhanced UI responsiveness by 30%.
- **COVID-19 Plasma Donation Portal:** Directed the UX design and development to connect plasma donors with recipients, increasing accessibility by 50%.
- **TODO App:** Designed a full-stack MERN application for task management, featuring complete CRUD functionality.
  - **Frontend:** Built using React and Tailwind CSS, it includes form validation, password visibility toggling, and secure authentication with JWT. Added WhatsApp, email, and Telegram notifications.
  - **Backend:** Developed with Node.js, Express, and MongoDB, it supports protected routes and user management.
  - **Deployment:** The frontend is hosted on Vercel, while the backend is on Render, complete with proper CORS configuration and Swagger documentation.
  - **Live URL:** <https://mern-todo-app-tan.vercel.app/>
